Experience

Equinix

Warsaw

Python Developer with DevOps

Nov. 2020 - currently

- Created **automation software** to streamline creation of new projects and CI/CD pipelines.
- Maintenance of our **Jenkins Shared Library** and Internal **GitHub Actions**.
- Created and maintained **the best documentation** in Product department (opinion backed by the most repository stars in our GitHub organisation).
- Deployment, maintenance and monitoring of **self-hosted GitHub Actions** runners.
- Handling **communication** and **prioritisation of tasks** in company-wide Jenkins to GitHub Actions migration.
- **Tech stack: Terraform, Terragrunt, AWS, Kubernetes, Java, Python, Argo CD, anything else that solved our problems**

Lingaro

Warsaw

Backend Developer/Data Engineer

March. 2019 - July 2020

- Created MVP **Smart City** application that collected data from **smart devices**, processed it and made it accessible through external API.
- Created connectors to **Google AdWords API** and **Facebook Marketing API** in order to collect data about ad campaigns.
- Created **ETL pipelines** that processed data used for training our **machine learning models**.
- Helped the Data Science team with **software development life cycle** (creating applications using their ML models, testing them, deploying, etc.).
- Created applications exposing our machine learning models.
- Helped with various matters related to the creation and management of **Azure** resources.
- **Tech stack: Java, Kubernetes, Azure, MS SQL Server, Python, Spark, Hadoop**

Freelance

Warsaw

Backend developer and Product Owner

Oct. 2018 - Jan. 2019

- **Negotiated terms of a contract** for the creation of an application responsible for collecting trucks' GPS information and sending it to external service.
- Defined **use cases** and helped **design the interface** of the application.
- Handled contact with client, external services providers, **project management**, etc.
- Created **REST client** responsible for communication with external service.
- **Tech stack: Go, DynamobDB**

TUiR Warta S.A.

Warsaw

Java Developer

June 2018 - Sep. 2018

- Created application that **processed faulty insurance transactions** and reported them in order to unburden our testers.
- **Tech stack: Java, VBA**

Confitura

Warsaw

Volunteer

2019 and 2022

- Helped organizing the biggest JVM conference in Poland
